Howard Marten Company Limited have developed standardized product lines for API-614 / ISO 10438 General Purpose Lube Oil Systems and non-API consoles which can be used in a wide range of applications in many different industries.

This standardized product line covers system flow rates from less than 1 GPM to as much as 50 GPM. These standardized systems can be customized to meet your unique application needs with minimal engineering required.

In addition to standard industry features, there are a wide range of options and accessories that can be added to any system based on the unique requirements of the project. Some of the accessories include:

- Various types of heat exchangers
- Dual coolers
- Additional instrumentation
- Thermostatic regulator
- Reservoir oil heater
- Transmitters in-lieu of switches
- Channel frame baseplate
- All stainless steel construction
- Insulated enclosures
- Control panels
- Hazardous area classifications
- and many more.
